MEMORANDUM FOR THE RECORD

SUBJECT: Conversation with Dr. Brzezinski,
21 June 1978

We discussed the importance of keeping the President advised of the balanced view, particularly of the intent of the Soviet Union. I made a particular point of the difficulty I face in doing this without having greater access to the policy-making fora and the problems I think this leaves the President of hearing the fallout of proposed policies only from the policymakers. Brzezinski indicated he would see if there were ways to correct this.
